SKILLS

PROGRAMMING
Advanced:
• .NET • HTML • CSS • Javascript • PHP APIs • MySQL • GraphQL • Git• Deluge • JQuery
Intermediate:
C • C++ • NodeJS • ReactJS • Ionic
Familiar:
AWS • Power Apps • Power Automate Photoshop • Premiere Pro

COURSEWORK

UNDERGRADUATE
Dot Net
Wordpress
Facebook & Instagram Ads
WooCommerce
Shopify

INTERESTS

TECHNICAL
Full stack • Zoho Creator • Zoho CRM • Power Platforms
NON-TECHNICAL
Music • Editing • Hardware & Networking

RESPONSIBILITIES

• Students' Representative

• CSE Student Advisory committee member

EXPERIENCE

SOFTURA PVT LTD | Software Engineer
Nov 2022 - Present | Chennai, India
Extensive working knowledge in .net,
power platform – powerapps, power automate, sharepoint

- Built API using .net to extract order data from third party ecommerce platforms like Shopify and move them to their respective destinations such as Amazon, CDW, Shipstation thereby managing the inventory and order status update.
- Designed and built Low-code applications for both administration and users using Powerapps to manage employee's return to the office, food orders, global announcements, parking management. Backend used for this application is SQL database.
- Built Low-code application to retrieve data from Sonarqube using Power automate and displayed statistics on bugs count and status dynamically on Powerapps based on an individual's projects.
- Created Power automate flow and trained a AI Model to read invoice data and push it to SharePoint list for further processing.
- Created application using Powerapps and Power automate to fetch relevant data from other sources through APIs and store it in SharePoint along with additional user data.

360DEGREE INFO PVT. LTD | Web Developer
Jan 2021 - Feb 2022 | Chennai, India

- Created E-Commerce website for KadhiKraft with payment gateway.
- Created internal management system for IncomeTax – TamilNadu Puducherry.
- Executing penetration testing for government-related websites.
- Customization of OpenCart and WordPress.

PROJECTS

CARCARAN [Live Link]
Created user, admin, dealer and DRM application to add cars and listing in the portal.
Admin can manage dealers and their car listings.
Used Algolia search to perform filter based on user search text.
Backed - MongoDB, NodeJS | Frontend - React, Tailwind CSS
